

# BuildUp!

Vital signs monitoring and alerting platform for buildings

**Protect your investments and reduce your operational expenses with BuildUp!**

BuildUp! is a revolutionary monitoring and alerting platform agnostic for your buildings' technical systems. It frees you from local monitoring and informs you in real time of the vital signs of your buildings. It integrates with your service desk, facilitates communication and coordination in the event of a breakdown, and automates processes. BuildUp! is accessible to all your teams thanks to its mobile version. It reduces incident response times, improves quality of service, and increases customer satisfaction.

BuildUp! is distinguished by its cloud architecture and artificial intelligence. It ensures industrial-grade performance and scales with your needs. In addition to its technical performance, security is central to BuildUp! All communications within the platform are encrypted to the highest industry standards, ensuring data confidentiality and integrity.

In short, BuildUp! is much more than just a monitoring and alerting platform. It's a complete solution that transcends traditional limitations. With its versatility, accessibility and unmatched security, BuildUp! redefines how buildings are monitored, managed, and maintained.

## Multi-Dwellings | Office Buildings | Schools | Hospitals

- Easily identify common events, anomalous behavior, and outliers to avoid costly damage and untimely shutdowns.
- Enjoy a consolidated, real-time view of your critical systems 24 hours a day, including ventilation, plumbing, electrical, security, and access.
- BuildUp! Positions itself as an open platform, seamlessly integrating with your existing systems using proven data protocols such as
- RS-232, RS-485, MS/TP, IP, as well as advanced wireless technologies like LoraWan, Bluetooth, and 5G.
- BuildUp! integrates seamlessly with industry leaders such as Johnson Controls, Siemens, Delta, Acuity, JLL, Schneider Electric, Honeywell, Mitsubishi, and many more.
- With the ability to manage millions of data points, thousands of sensors, and hundreds of actuators in individual buildings and expansive campuses around the world, BuildUp! has been performing exceptionally well.
- The web and mobile application ensures comprehensive and secure access to your building's vital data, while guaranteeing autonomy.
- It opens standalone service tickets for responders and integrates with your management tools such as ZenDesk, Freshdesk, Service Now, Hopem, and UpKeep.
- BuildUp! manages the collection of your ESG data. BOMA, LEED, etc. Minimizing your performance reporting efforts.
- The platform boasts top-notch security that meets the highest NIST standards.
- Protect your investments and reduce your operational costs with our fully cloud-based and secure solution.
- Monitor your entire real estate portfolio from a single point, with a return on investment typically realized in less than a year.
